ABOUT MARATHON PIPE LINE LLC

Marathon Pipe Line LLC operates over 6,000 miles of underground pipeline in 14 states. These pipelines transport crude oil, petroleum products and natural gas to and from terminals, refineries and other pipelines across the nation. Movement of these liquids and gas through pipelines is the safest method of transporting energy. To learn more about Marathon, log on to <http://marathonpipeline.com/>

To view the approximate location of pipelines in your area, visit www.npms.phmsa.dot.gov For more information about pipelines in general, visit www.pipeline101.com

COMMITMENT TO SAFETY, HEALTH & THE ENVIRONMENT

Marathon Pipe Line is committed to experiencing no accidents, no harm to people, and no damage to the environment. Marathon utilizes a comprehensive risk-based Integrity Management Program to ensure the safety of the pipelines, where a pipeline release could affect a densely populated area, drinking water, ecological area, or a commercially navigable waterway. These management programs include routine in-line inspection, maintenance, leak detection, surveillance, and corrosion control. You can find more information at the Marathon Pipe Line website listed above or by contacting the Marathon area office nearest you.

EMERGENCY RESPONSE

When an emergency occurs, gain control of the situation as quickly as possible with the following objectives:

- Assess the situation. Determine the hazards and risks.
- Only enter a hazardous area if personnel are properly trained and equipped.
- Never enter a hazardous area without a properly trained and equipped backup.

- Rescue any injured person, if safe to do so.
- Evacuate persons in any endangered area.
- Prohibit the public from entering the area.
- Control ignition sources.
- **Call Marathon Pipe Line's emergency number 1-800-537-6644** and provide the following information:
 - Location;
 - Nature of the problem; and
 - A telephone number at which a responsible person can be contacted.

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

arise with its pipeline facilities and operations. Here are a few key topics that you should review prior to the unlikely event of a pipeline emergency:

EMERGENCY RESPONSE PLANS

Marathon has developed extensive response plans for all of its facilities based on the knowledge of its own personnel, available equipment, tools and materials. These plans are accessible at every facility. This document provides a general overview of Marathon's capabilities. For more detailed information or to review the Emergency Response Plan, please contact the Area Manager at the Marathon office nearest you. Marathon can provide assistance in planning your emergency procedures, recognizing that the primary authority lies with you, the local emergency response organization.

COMMUNICATING WITH MARATHON DURING AN EMERGENCY

If a pipeline event occurs, emergency response officials will be notified and Marathon operations personnel will be dispatched to the site. Marathon personnel and/or contractors will be at the site as quickly as possible.

If you or another emergency response organization has set up an Incident

Command Center prior to the arrival of Marathon personnel, the first Marathon employee to arrive at the site should be introduced to the incident commander as the Marathon representative.

PUBLIC SAFETY AND EVACUATIONS

Evacuation plans and procedures should reflect the available assets and capabilities of your own organization. Expert knowledge of your area is key to creating the best evacuation, traffic control and rerouting, and railroad stoppage plans in order to limit public exposure and minimize accidental ignition.

FIRE OR EXPLOSION

Marathon does not have dedicated fire response personnel and must rely on the capabilities of local responders. Petroleum and natural gas emergencies present unique challenges for response personnel, so proper training is crucial. Contact your state fire marshal for pipeline emergency training. The U.S. Department of Transportation Emergency Response Guidebook provides information on potential hazards, public safety and emergency response.

RESCUE OR MEDICAL DUTIES

Marathon employees are not trained to conduct rescue operations of any kind. Emergency response personnel will be contacted to assist with any needed rescue. Coordination will be made with emergency services or with a local hospital or medical provider in the event of a medical emergency.

PIPELINE EQUIPMENT AND FACILITIES

Federal law requires specific training to operate pipeline equipment; therefore, Marathon employees will handle these duties. DO NOT attempt to operate any pipeline equipment, such as valves, in an emergency because doing so may worsen the situation.

BOMB OR SECURITY THREAT

Marathon relies on the public to be its eyes and ears along the pipeline. If you witness any act of vandalism, loitering, receive a bomb threat involving a Marathon facility or other suspicious activity along the right of way or pipeline facility, please report it immediately to the Marathon Operation Center at 1-800-537-6644.

NATURAL DISASTERS

When a natural disaster (hurricane, storm, flood, tornado, volcano or earthquake) strikes or is pending, the area will be monitored during the disaster. Pipeline facilities will be inspected after the disaster. Marathon station personnel may contact emergency officials to identify any road closures that may hamper access to the facility.

RIGHT OF WAY ACTIVITY

One of the greatest threats to safe pipeline operation is the accidental damage caused by excavation, construction, farming activities, and homeowner construction and maintenance. Awareness is crucial in preventing these accidents. Call IMMEDIATELY if you see suspicious or questionable activity near the pipeline right of way. No one should conduct blasting, digging, ditching, drilling, leveling or plowing near the pipeline right of way without first contacting the state one call center.

Be aware, that pipelines frequently share rights of way with other utilities (electric power lines, additional pipelines) or modes of transportation (roadways, railroads, etc.). Incidents such as lightning strikes, fires, train derailments, etc. on or near the right of way can damage an underground pipeline. Should incidents such as these occur and a pipeline operated by Marathon Pipe Line LLC is nearby, please call the MPL emergency number at 1-800-537-6644 to report the incident.

PIPELINE SYSTEMS MAP

Log on to www.marathonpipeline.com. Click the Pipeline Systems Map to view pipelines operated by Marathon Pipe Line LLC in your area. Emergency officials are encouraged to download the free Pipeline Finder app. Visit www.marathonpipeline.com/pipelinefinderapp or scan the QR Code to access downloading instructions.

CLOSURE

The information above provides an outline of points to remember when dealing with a pipeline emergency. Remember, Marathon Pipe Line personnel are trained to deal with such emergencies. Without their input, the risk to those involved can be greatly increased. Therefore, contacting Marathon in the event of any pipeline emergency is critical.
