

OVERVIEW

Texas Gas is an interstate pipeline that moves natural gas from Gulf Coast and Fayetteville Shale supply areas to more distant on-system markets in the Midwest and to off-system markets in the Northeast via interconnections with third-party pipelines. It originates in the Louisiana Gulf Coast area and in East Texas and runs north and east through Louisiana, Arkansas, Mississippi, Tennessee, Kentucky, Indiana, and into Ohio, with smaller diameter lines extending into Illinois.

PIPELINE AND STORAGE FACILITIES

The Texas Gas system is composed of:

- Approximately 5,950 miles of pipeline, having a peak-day delivery capacity of approximately 3.8 billion cubic feet (Bcf) per day which includes deliveries to pipeline interconnects in South Louisiana;
- 31 compressor stations having an aggregate of approximately 552,700 horsepower; and
- Nine natural gas storage fields located in Indiana and Kentucky, having aggregate storage capacity of approximately 180.0 Bcf of gas, of which approximately 77.0 Bcf is designated as working gas.

PIPELINE SAFETY

Boardwalk Pipeline Partners and its predecessors have been delivering natural gas to customers since the 1930's. Our pipelines carry natural gas used to heat homes and fuel appliances throughout the Southern United States.

Natural gas pipeline systems are designed and constructed in accordance with strict pipeline safety standards established by industry experts and the Department of Transportation (DOT).

Boardwalk is committed to operating its pipelines safely. Safety was built into every step of the process from facility design to construction to final operation.

Underground natural gas pipelines are the safest mode of energy transportation - safer than highway, railroad, airborne or waterborne transport.

If you notice suspicious activity near our pipeline, call our Gas Control Center immediately at 1-800-626-1948.

By working together, we can keep our natural gas pipelines operating safely and quietly without disturbances or inconvenience to our neighbors.

COMMUNITY

Texas Gas Transmission, LLC is proudly committed to the communities we serve. Many of our company's officers and employees serve on boards, participate in fund-raising and volunteer for local nonprofit groups. We encourage our employees to participate in community organizations, projects and initiatives. We also encourage charitable giving to these causes, and we match each employee's donation dollar for dollar up to a specified amount to an eligible organization.
